

Why Insulate With R-ETRO High Performance Insulation System?

- ✓ The R-ETRO System is fast, easy to install and ready-to-finish.
- ✓ Offers R-10, R-18 or R-26 options for **interior** or **exterior** walls.
- ✓ Quickly attaches to **new** or **existing** structures made of wood, steel, concrete, brick or masonry block.
- ✓ Easily adapts to the shape of existing structures and around protrusions, openings and curved walls.
- ✓ Incorporates evenly spaced fastening points to attach exterior cladding and interior finishes including drywall, lapped siding, stucco and stone veneer.
- ✓ Utilizes a built-in drainage feature to help prolong building life.
- ✓ There is minimal job-site waste and **all components** are 100% recyclable.
- ✓ Made from high density, expanded polystyrene (EPS) which does not support mold or mildew growth and will not rot.
- ✓ Components are produced by the only ICF manufacturing company that is both ISO: 9001 and ISO: 14001 certified ensuring stringent quality control and an environmental commitment.
- ✓ The R-ETRO System qualifies for many government tax credit and incentive programs.
